1.5. CHANGES AND CORRECTIONS

The tables below explain the differences in values reported in this report (2021 annual report) and the previous EUTF MLS report (S1 2021). These changes and corrections are due to (i) indicator mapping revisions (when a project activity output and the associated data has been 'remapped' from one EUTF indicator to another), (ii) multiplier revisions (that is, adjustments to the formula used by the MLS to account for double counting of outputs), (iii) data corrections provided by the IP, (iv) data corrections made by the MLS team (for example, when unusual patterns are observed in a project's historical data and the IP is unable to provide an explanation in time for the report, the data points are temporarily removed from the database), (v) a project providing historical data that was not previously reported to the MLS and (vi) newly included projects in the MLS providing historical data retroactively. Particularly significant changes or corrections are further explained in the footnotes.
