### Footnotes

1. Projects with SO2 priority have a larger budget allocation to SO2 than to any other Strategic Objective, per the MLS portfolio analysis.
2. The age of 53% of service delivery beneficiaries (EUTF 2.2) is unspecified.
3. The colours on the map represent the number of SO2 priority projects in each region. However, the key outputs selected highlight notable results achieved by EUTF projects, and do not always correlate with the number of projects present in a given area.
4. The S2 2022 output reported here differs from the 279,225 beneficiaries reported in the previous infographic, which is attributable to data reported retroactively, mainly by the DRR Oromia project (Ethiopia).
5. The S1 2022 output reported here differs from the 6,001 beneficiaries reported in the previous infographic, which is attributable to minor data corrections by RED UBF (Uganda) and the retroactive inclusion of the ILED RAAISE FAO (Somalia) project in the MLS.
6. The S2 2022 output reported here differs from the 12,948 beneficiaries reported in the previous infographic, which is similarly attributed to data corrections by RED UBF and retroactive inclusion of ILED RAAISE FAO, although the difference is mainly due to data reported retroactively by the RESET Plus Amref II project (Ethiopia).
